TreSean White

Senior Full-Stack Developer

Hello@snipelink.com | Remote | snipelink.com

SUMMARY

Senior full-stack developer specializing in TypeScript, React, and Node.js with a track record of shipping production applications fast. I leverage AI-assisted development workflows to deliver 5-10x faster than traditional timelines. Experienced across SaaS platforms, payment systems, real-time analytics, blockchain/Web3, and cloud deployment. Every project ships production-ready with error handling, auth, and scalable architecture.

TECHNICAL SKILLS

TypeScript | JavaScript | React | Next.js | Node.js | Express | PostgreSQL | SQLite | MongoDB | REST APIs | GraphQL | Solana / Web3 | Payment Integration | Stripe | AI / LLM Integration | Vite | Tailwind CSS | Docker | Railway | Vercel | Git / GitHub | CI/CD | Auth / OAuth / JWT | Real-Time / WebSockets

SHIPPED PROJECTS

SnipeLink

snipelink.com

Full-stack payment platform handling invoicing, payment links, and transaction management for freelancers and businesses.

TypeScript · React · Node.js · PostgreSQL · Railway

SolAudit

Solana blockchain auditing and analytics tool providing real-time transaction monitoring, wallet analysis, and smart contract inspection.

TypeScript · React · Solana/Web3 · Node.js · PostgreSQL

SkyEar

Real-time audio monitoring and signal intelligence platform with live data processing, visualization dashboards, and alert systems.

TypeScript · React · Node.js · Real-Time Data · WebSockets

First Responder Analytics

Data analytics dashboard for emergency services — real-time incident tracking, response time metrics, geographic heatmaps, and reporting.

TypeScript · React · Express · PostgreSQL · Data Visualization

MixMaster Pro

Production-deployed audio mixing and production platform with real-time processing, session management, and collaboration features.

TypeScript · React · Node.js · Railway · Real-Time Audio

Agency Command

AI-powered freelance management dashboard with automated job scraping, Claude-generated proposals, client pipeline tracking, and invoicing.

React · Express · SQLite · Claude API · RSS Scraping · Railway

EXPERIENCE

Freelance Senior Full-Stack Developer

Present

Independent — Remote

- Ship production web applications end-to-end: architecture, frontend, backend, database, deployment
- AI-assisted development workflow delivering projects in days instead of weeks
- Specialize in React/TypeScript frontends with Node.js/Express backends on Railway
- Built and operate SnipeLink, a payment platform used for client invoicing
- Deliver across verticals: fintech, blockchain/Web3, analytics, SaaS, e-commerce

WHAT I DELIVER

- **Speed:** AI-assisted workflow = full-stack apps shipped in 1-2 weeks that would take others months
- **Production-ready:** Error handling, auth, validation, responsive UI — no cutting corners
- **Full ownership:** I handle everything from database schema to deployment pipeline
- **Clear communication:** Regular updates, no surprises, 50/50 payment structure
